Enclosed is a draft Cleanup and Abatement Order (Order) to be issued to Cindy Strieff, Randy Strieff Jr., Rachel Ruhe, and Trustee of Robert & Prudence Lammers Revocable Trust (Dischargers) for the cleanup and abatement of effect of discharges of asphalt, cement, rock, and other earthen materials from dam construction activities and its subsequent failures, as well as effects of stream alterations/widening to East Fork Stillwater Creek and elimination of the threat of future discharges from Assessor Parcel 306-250-004-000 in Shasta County (Site). The draft Order requires the Dischargers to clean up and abate the discharges of wastes to surface water and surface water discharge courses and further requires action be taken to prevent future discharges from the Site.

The enclosed Order is a draft Order. The Central Valley Water Board intends to issue this Order, but offers you the opportunity to provide comments on the draft Order prior to doing so. **Please provide any comments to this office by 23 May 2016.**

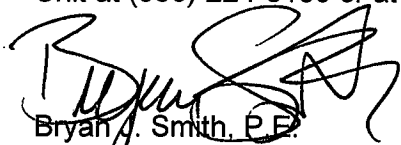

The draft Order includes a time schedule for compliance with the tasks set forth in the draft Order. The first task requires that **by 1 August 2016**, the Dischargers shall prepare and provide plans for the removal of the existing dam and completion of stabilization and mitigation efforts necessary to restore East Fork Stillwater Creek's pre-dam flow regime.

In order to conserve paper and reduce mailing costs, a paper copy of the order has been sent only to the Dischargers. Interested parties are advised that the full text of this draft Order will be available shortly on the Water Board's web site at:
